

Basavaraju M

Aspiring Python Developer and Data Analyst

+91 8073682262 — connect.basavarajumallikarjun@gmail.com

Professional Summary

Motivated MCA student with strong knowledge of Python programming, web development, and database management systems. Passionate about building practical software solutions, solving real-world problems, and continuously improving technical skills through hands-on learning and project development.

Technical Skills

- **Programming Languages:** Python, C
- **Web Technologies:** HTML, CSS, Flask
- **Database:** MySQL
- **Machine Learning:** Pandas, Scikit-Learn, XGBoost
- **Tools:** VS Code, Git, GitHub
- **Core Concepts:** OOPs, Data Structures, Problem Solving
- **Operating System:** Windows

Internship Experience

Application Developer (Python Intern)

ADVI Group of Companies

- Assisted in developing Python-based applications and worked on real-time problem-solving tasks.
- Gained practical experience in web development, debugging, API integration, and software development workflows.
- Collaborated with team members to understand project requirements and implement effective solutions.
- Enhanced coding proficiency and professional skills through hands-on industry exposure.

Projects

Underground Water Prediction

- Developed a machine learning model to predict underground water availability using environmental and geological datasets.
- Performed data preprocessing, model training, and evaluation to improve prediction accuracy.

Smart Tax Fraud Detection

- Built a machine learning-based system to identify fraudulent tax transactions and suspicious patterns.
- Applied classification algorithms and feature engineering techniques to improve fraud detection performance.

Text-To-Image Synthesis

- Developed a Flask-based web application that generates images from text prompts using Stability AI API.
- Integrated API handling and designed a responsive interface using HTML and CSS for user interaction.

Certifications

- NASSCOM Digital Engineering Course
- Data Structures in C – Coursera
- Introduction to Data Analysis Using Python – Coursera
- Python Full Stack Development – Pentagon Space (Currently Pursuing)

Achievements

- Volunteered and coordinated activities during college technical events and fests.
- Actively participated in technical workshops and skill development programs.
- Demonstrated leadership, teamwork, and event management abilities through extracurricular activities.

Strengths

- Problem Solving
- Analytical Thinking
- Quick Learner
- Team Collaboration
- Continuous Learning

Languages

English, Kannada, Telugu
